This engineering program at UNIC Global Semesters offers two engineering courses for 6 credits over the course of 6 weeks in Cyprus, the top Mediterranean island in Europe. The program includes The Cyprus 7-City Tour, a combination of weekend and day trips all around the country, and program support throughout your time in Cyprus. Optional history of art class in substitution of one engineering class.

COURSES

ME 2302 Engineering Dynamics
ME 3370 Fluid Mechanics
